CJB Restoration Services is a restoration contractor committed to the Greater Vancouver and Fraser Valley insurance industry. We remain dedicated by meeting the needs of the insured following a loss from any insured peril.

Founded in 1996, CJB Restoration Services continues to be one of the most active restoration contractors in the service area. The company's portfolio represents emergency response and specialization in:

- **FIRE & SMOKE DAMAGE**
- **STRUCTURE REPAIRS & REBUILDS**
- **CONTENT CLEANING & STORAGE**
- **WATER EXTRACTION & DRYING**
- **IMPACT & VANDALISM LOSSES**
- **WIND & STORM DAMAGE**
- **CARPET CARE**
- **DEBRIS BIN SERVICES**
- **ENVIRONMENTAL DAMAGE**

CJB Restoration Services ensures quality on job sites through it's conformity with the plans and specifications by implementing specialized knowledge of home construction and current restoration methods and procedures. Direct involvement in all job co-ordination and information management enables CJB Restoration Services to monitor each job's schedules ,specifications and budgets from start to finish. We have a 10 year history of achieving solid results from implementing our unique and flexible restoration procedures.

Our company holds the ability to supervise and assist in all phases of job flow from planning and organizing to onsite construction and restoration. CJB Project Mangers obtain signed Work Authorizations from the insured at the commencement of work and a signed Completion Certificate at the end of a restoration project to enforce quality control. Project Managers also inspect work throughout the duration of the job to ensure work is meeting the satisfaction of the insured.

Contents Division

CJB Restoration is a full service company which prides itself on a complete job. Included in our outstanding service for reconstruction to damaged structures from all types of insured perils, we further provide full contents handling. Incorporated in our contents handling are photo inventory documentation, cleaning and storage. CJB Restoration follows through the process of sorting contents and identifying items that can be salvaged and restored, or that are not restorable.
